Genetic testing Leonberger Polyneuropathy LPN1

You have contributed samples to our research project. We applied a recently developed DNA test that allows the unequivocal diagnosis of LPN1 carriers. Further details are given on the information sheet at our web site

http://www.genetics.unibe.ch/content/service/dog/index_eng.html

Lab ID	Dog	Kennel	Breeding ID	Chip ID	Sex	DOB	LPN1 genotype
LB3452	Angel Harko	Löwe vom Spittergrund	VDH/DLZB24497		f	06.02.2011	N/N
LB3453	Konners	La Roseraie Pourpre	LOCH1105719		m	24.10.2011	N/N
LB3454	Laela	Lions from D'es	LOSH1112183		f	24.04.2012	N/N
LB3455	Ghost	von Leuenfort	VDH/DLZB25389		m	13.07.2012	N/N
LB3456	Mi Amigo	de Leo's vom Kvalik	LOE2107083		m	17.07.2012	N/N
LB3457	Lona	Lions from D'es	LOCH1120633		F	21.10.2012	N/N
X LB3458	My Real Friend Mr. Mistery	Lions from D'es	LOCH1133439		m	27.08.2013	N/N

The diagnostic test was carefully conducted using state-of-the-art methodology. Nevertheless, errors cannot be excluded with 100% probability, as there is for example always a very small possibility of novel unknown DNA mutations. We therefore cannot give a warranty on the accuracy of the results. Any liability for subsequent damages in the course of an incorrect test result is excluded.

The International Leonberger Union (ILU; www.leonbergerunion.com) wants to publish the LPN1 genotypes. Therefore, ILU pleases you to e-mail this page to secretary@leonbergerunion.com or to send a hard copy to: International Leonberger Union, Hein Sibrijns, La Tissière, F-03130 Loddes.

Kind regards

Prof. Dr. Cord Drögemüller
